

PUBLICATIONS of Ch.G. van Weert

Book and review articles:

S.R. de Groot, W.A. van Leeuwen, and Ch.G. van Weert, Relativistic Kinetic Theory, North-Holland Publ. Comp., Amsterdam, 1980. Russian translation: Moskou Press, 1983.

C. Teitelboim, D. Villarroel, and Ch.G. van Weert, Classical Electrodynamics of Retarded Fields and Point Particles, Riv. Nuovo Cimento **3** (1980) 1-64.

Ch.G. van Weert and M.C.J. Leermakers, Landau theory of a QED plasma, Acta Phys. Pol. **B16**(1985)459-477.

N.P. Landsman and Ch.G. van Weert, Real- and Imaginary-Time Field Theory at Finite Temperature and Density, Phys.Rep. **145**(1987)141-249.

Ch. G. van Weert, Aspects of Thermal Field Theory, Proceedings of the third Workshop on Thermal Field Theories and their Applications, F.C. Khanna, R.Kobes, G.Kunstatter, H.Umezawa eds. (World Scientific, Singapore, 1994) 1-25.

Courses:

Ch.G. van Weert, Methods of Quantum Statistical Mechanics, ITFA publication 1985, 136 pp.

N.P. Landsman, A.M.J. Schakel, and Ch.G. van Weert, Symmetry Breaking, ITFA publication 1987, 132 pp.

Ch.G. van Weert, N.P. Landsman, and A.M.J. Schakel, Quantum Field Theory of Condensed Matter, ITFA publication 1988, 154 pp.

Ch.G. van Weert, Lecture Notes on Quantum Statistical Field Theory, ITFA publication 1990, 56 pp.

Ch.G. van Weert, Lecture Notes on Statistical Field Theory, ITFA publication 1999, 54 pp.

Ch.G. van Weert, Lecture Notes on Thermal Field Theory, ITFA publication 2001, 100 pp.

Thesis:

Ch.G. van Weert, On the relativistic kinetic theory of particles with a magnetic dipole moment in an external electromagnetic field, Amsterdam, 18 november 1970; also published in Proc. Kon.Ned.Akad.Wet. **B.73** (1970) 381,397,500,517.

Papers:

S.R. de Groot, C.G. van Weert, W.Th. Hermens and W.A. van Leeuwen, Relativistic Onsager relations in kinetic gas theory, *Phys.Lett.* **26A** (1968) 345.

S.R. de Groot, C.G. van Weert, W.Th. Hermens and W.A. van Leeuwen, Relativistic entropy law for a gas mixture outside equilibrium, *Phys.Lett.* **26A** (1968) 439.

S.R. de Groot, C.G. van Weert, W.Th. Hermens and W.A. van Leeuwen, On relativistic kinetic gas theory I. The second law for a gas mixture outside equilibrium, *Physica* **40** (1968) 257-276.

S.R. de Groot, C.G. van Weert, W.Th. Hermens and W.A. van Leeuwen, On relativistic kinetic gas theory II. Reciprocal relations between transport phenomena, *Physica* **40** (1969) 581-593.

S.R. de Groot, C.G. van Weert, W. Th. Hermens en W.A. van Leeuwen, On relativistic kinetic gas theory III. The non-relativistic limit and its range of validity, *Physica* **42** (1969) 309-319.

S.R. de Groot, C.G. van Weert, W. Th. Hermens and W.A. van Leeuwen, On the role of space and time symmetries in kinetic theory, *Physica* **43** (1969) 109-131.

W.Th. Hermens, W.A. van Leeuwen, Ch.G. van Weert and S.R. de Groot, On relativistic kinetic gas theory VIII. Reciprocal relations for a reactive mixture, *Physica* **60** (1972) 472.

Ch.G. van Weert, P.C. de Jagher and S.R. de Groot, On relativistic kinetic gas theory XI. Volume viscosity in a model consisting of particles with excited states, *Physica* **66** (1973) 474-487.

Ch.G. van Weert, W.A. van Leeuwen and S.R. de Groot, Elements of relativistic kinetic theory, *Physica* **69** (1973) 441-457.

Ch.G. van Weert, Relativistic treatment of multipole radiation from an extended charge-current distribution I. Asymptotic properties of the electromagnetic field, *Physica* **65** (1973) 452-468.

Ch.G. van Weert, Relativistic treatment of multipole radiation from an extended charge-current distribution II. Energy-momentum and angular-momentum radiation rate; radiation reaction, *Physica* **66** (1973) 79-93.

Ch.G. van Weert, A direct method for calculating the bound four-momentum of a classical charge, *Phys.Rev.* **D9** (1974) 339-341.

Ch.G. van Weert, On the covariant equations of motion with explicit radiation damping I. General formalism, *Physica* **76** (1974) 345-363.

W.P.H. de Boer and Ch.G. van Weert, Relativistic transport equation for spin- $\frac{1}{2}$ particles, *Phys.Lett.* **50A** (1974) 381.

Ch.G. van Weert, On the covariant equations of motion with explicit radiation damping II. Comparison with the theory of Bhabha and Harish-Chandra, *Physica* **80A** (1975) 234-246.

Ch.G. van Weert, On the covariant equations of motion with explicit radiation damping III. The Lorentz-Dirac equation and its generalization to a magnetic dipole particle, *Physica* **80A** (1975) 247-259.
